

# Ringor Sizing

Ringor has always manufactured our shoes using gender-specific Domestic (U.S.) sizing standards rather than European or Asian sizing standards. When comparing or determining your Ringor shoe size, please be sure to consult shoes that you already own and consider well-fitting. For comparison, we suggest you use your "most common athletic shoe size".

Ringor women's footwear is specifically designed for the female athlete's foot. For that reason, Ringor women's footwear runs consistently a half size smaller than other athletic shoes. For example, if your most common athletic shoe size is a women's size 8, we encourage you to order a Ringor size 8.5. Please see the size charts below for size conversions.
